AMENDMENT AFTER FINAL

In reply to the Final Office Action of February 26, 2003, and pursuant to 37 C.F.R. § 1.116, Applicants propose that this application be amended as follows:

Serial No.: 09/282,764

10. (Twice Amended) The method of Claim 6, further including:

 $f_{\overline{3}}$

ranking said documents in accordance with terms occurring in said user search query and terms occurring in said multiple categories of the first supercategory.

12. (Amended) The method of Claim 6, wherein said determining a first of said at least one supercategory in accordance with said user search query includes:

determining a geographic area that is a search term included in said user search query.

15. (Three Times Amended) A computer program product for displaying advertisements comprising:

machine executable code for determining at least one category as containing documents that may be retrieved;

machine executable code for associating at least one supercategory with multiple categories by mapping the multiple categories to the at least one supercategory;

machine executable code for associating an advertisement with at least one of said supercategories;

machine executable code for determining at least one term associated with a user search query:

FB Fnd

EXPEDITED PROCEDURE REQUESTED UNDER 37 CFR § 1.116

Serial No.: 09/282,764

machine executable code for determining a geographic area that is a search term included in said user search query.

24. (Four Times Amended) An apparatus for displaying advertisements comprising:

means for defining at least one category as containing documents that may be retrieved;

means for associating at least one supercategory with multiple categories by mapping the categories to the at least one supercategory;

means for associating an advertisement with at least one of said supercategories;

means for determining at least one term associated with a user search query;

means for determining a first of said at least one supercategory based on at least one term of said user search query and said multiple categories of the at least one supercategory; and

means for displaying an advertisement associated with said first supercategory.

25. (Amended) The computer program product of Claim 24, wherein there is more than one supercategory and said first supercategory is a most relevant supercategory corresponding to said user search query, and said apparatus further includes:

לא 13-13

5

EXPEDITED PROCEDURE REQUESTED UNDER 37 CFR § 1.116 Serial No.: 09/282,764

Kramer is directed to the modeling of consumer attributes for targeting content in a privacy preserving manner. According to Kramer, consumer profiles are developed and maintained with information reflecting the consumer's online and offline transactions. The attribute vectors of Kramer are disclosed in additional detail in Fig. 9 and at Column 21, line 62 through Column 24, line 35 of Kramer. These attribute vectors are not defined as containing documents that may be retrieved. In contrast, the attribute vectors are simply hierarchical vectors. Thus, Applicants submit that the attribute vector of Kramer clearly does not disclose or suggest the categories as defined in pending claim 6 (as amended).

Applicants submit that because Kramer does not disclose or suggest the categories recited in claim 6, Kramer further could not possibly disclose or suggest the "supercategory" recited in claim 6.

Amended claim 6 further recites determining at least one term associated with a user search query, determining a first of the at least one supercategory based on the at least one term of the user search query and the multiple categories of the at least one supercategory, and displaying an advertisement associated with the first supercategory. The Examiner addresses this portion of claim 6 in numbered paragraph six of the final Office Action. In particular, the Examiner appears to be equating the query of database 804 in Kramer with the claimed feature of "determining a first of the at least one supercategory based on the at least one term of the user search query." As recited in amended claim 6, however, the first of at least one supercategory is determined based on at least one term of a <u>user search query</u>. A user search query is not equivalent to the

Serial No.: 09/282,764

Furthermore, Applicants respectfully point out that the final action by the Examiner presented some new arguments as to the application of the art against Applicants invention. It is respectfully submitted that the entering of the Amendment would allow the Applicants to reply to the final rejection and place the application in condition for allowance.

Finally, Applicants submit that the entry of the amendment would place the application in better form for appeal, should the Examiner dispute the patentability of the pending claims.

In view of the foregoing remarks, Applicants submit that the claimed invention, as amended, is neither anticipated nor rendered obvious in view of the prior art references cited against this application. Applicants therefore request the entry of this Amendment, the Examiner's reconsideration and reexamination of the application, and the timely allowance of the pending claims.

Serial No.: 09/282,764

VERSION WITH MARKINGS OF CLAIMS TO SHOW PROPOSED CHANGES

6. (Three Times Amended) A method executed in a computer system for targeting advertisements comprising:

[associating] defining at least one category [with] as containing documents that may be retrieved [, said category including at least one term];

associating at least one supercategory with multiple categories by mapping the multiple categories to the at least one supercategory;

associating an advertisement with at least one of said supercategories;

determining at least one term associated with a [data] user search query;

determining a first of said at least one supercategory based on at least one term of said [data] user search query and said multiple categories of the at

displaying an advertisement associated with said first supercategory.

7. (Amended) The method of claim 6, wherein there is more than one supercategory and said first supercategory is a most relevant supercategory corresponding to said [data] <u>user search</u> query, and the method further including: ranking said more than one supercategory to determine said first supercategory.

least one supercategory; and

machine executable code for determining a first of said at least one supercategory based on at least one term of said [data] <u>user search</u> query and said multiple categories of the at least one supercategory; and

machine executable code for displaying an advertisement associated with said first supercategory.

16. (Amended) The computer program product of Claim 15, wherein there is more than one supercategory and said first supercategory is a most relevant supercategory corresponding to said [data] <u>user search</u> query, and the computer program product further includes:

machine executable code for ranking said more than one supercategory to determine said first supercategory.

19. (Twice Amended) The computer program product of Claim 15, further including:

machine executable code for ranking said documents in accordance with terms occurring in said [data] <u>user search</u> query and terms occurring in said multiple categories of the first supercategory.

21. (Twice Amended) The computer program product of Claim 15, wherein said machine executable code for determining a first of said at least one supercategory in accordance with said [data] <u>user search</u> query includes:

EXPEDITED PROCEDURE REQUESTED UNDER 37 CFR § 1.116 Serial No.: 09/282,764

means for ranking said more than one supercategory to determine said first supercategory.

Serial No.: 09/282,764

machine executable code for determining a geographic area that is a search term included in said [data] <u>user search</u> query.

24. (Four Times Amended) An apparatus for displaying advertisements comprising:

means for [associating] <u>defining</u> at least one category [with] <u>as containing</u> documents that may be retrieved [, said category including at least one term];

means for associating at least one supercategory with multiple categories by mapping the categories to the at least one supercategory;

means for associating an advertisement with at least one of said supercategories;

means for determining at least one term associated with a [data] <u>user</u> search query;

means for determining a first of said at least one supercategory based on at least one term of said [data] <u>user search</u> query and said multiple categories of the at least one supercategory; and

means for displaying an advertisement associated with said first supercategory.

25. (Amended) The computer program product of Claim 24, wherein there is more than one supercategory and said first supercategory is a most relevant supercategory corresponding to said [data] <u>user search</u> query, and said apparatus further includes:

- 10. (Twice Amended) The method of Claim 6, further including:
 ranking said documents in accordance with terms occurring in said [data]
 user search query and terms occurring in said multiple categories of the first
 supercategory.
- 12. (Amended) The method of Claim 6, wherein said determining a first of said at least one supercategory in accordance with said [data] <u>user search</u> query includes:

determining a geographic area that is a search term included in said [data] user search query.

15. (Three Times Amended) A computer program product for displaying advertisements comprising:

machine executable code for [associating] <u>determining</u> at least one category [with] <u>as containing</u> documents that may be retrieved[, said category including at least one term];

machine executable code for associating at least one supercategory with multiple categories by mapping the multiple categories to the at least one supercategory;

machine executable code for associating an advertisement with at least one of said supercategories;

machine executable code for determining at least one term associated with a [data] <u>user search</u> query;

Serial No.: 09/282,764

To the extent necessary, a petition for an extension of time under 37 C.F.R. § 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account No. 07-2339 and please credit any excess fees to such deposit account.

Verizon Corporate Services Group Inc.

James Weixel

Date: 4/21/2003

600 Hidden Ridge, HQE03H01 Irving, Texas 75038 781/466-2220

Serial No.: 09/282,764

query of database 804 disclosed by Kramer. According to Kramer, database 804 contains facts that are used to build an attribute vector by computing device 802. (Kramer, col. 20, lines 61-68). Accessing a database to build an attribute vector, as disclosed by Kramer, does not disclose or suggest determining a first of the at least one supercategory based on the at least one term of the user search query, as recited in claim 6. Kramer does not disclose using a user search query to access database 804, much less using a user search query to determine a supercategory.

For at least these reasons, Applicants submit that the rejection of claim 6 is improper and should be withdrawn.

Independent claims 15 and 24, as amended, recite features similar to those recited in claim 6, and therefore, based on similar rationale, the rejection of these claims should also be withdrawn. The rejection of dependent claims 7-14, 16-23, and 25, at least by virtue of their dependency on one of independent claims 6, 15, and 24, should also be withdrawn.

Applicants respectfully request that this Amendment under 37 C.F.R. § 1.116 be entered by the Examiner, placing claims 6-25 in condition for allowance. Applicants submit that the proposed amendments of claims 6, 15, and 24 do not raise new issues or necessitate the undertaking of any additional search of the art by the Examiner, since all of the elements and their relationships claimed were either earlier claimed or inherent in the claims as examined. Therefore, this Amendment should allow for immediate action by the Examiner.

Serial No.: 09/282,76

f,o End

means for ranking said more than one supercategory to determine said first supercategory.

REMARKS

In the final Office Action of February 26, 2003, the Examiner maintained the previous rejection of claims 6-25 under 35 U.S.C. § 102(e) based on U.S. Patent No. 6,327,574 to <u>Kramer et al.</u> ("Kramer").

By this After Final Amendment, Applicants propose amending claims 6, 15, and 24 to more clearly define the features of the present invention. Support for these amendments can be found at, for example, pages 21 and 22 and Figs. 14 and 15 of the pending application. Dependent claims 7, 10, 12, 16, 19, 21, and 25 are also amended to conform to the changes in claims 6, 15, and 24.

In the final Office Action, the Examiner maintained the previous rejection based on Kramer. In particular, regarding claim 6, the Examiner states that Kramer teaches "associating at least one category (e.g., infant/preschool) with documents (candidate illuminations, col. 33 lines 8-13)." (Office Action, numbered paragraph 5). Thus, the Examiner appears to be equating the hierarchical attribute vectors, which encode attributes of a consumer, such as whether the consumer is an infant, with the category recited in claim 6.

Applicants respectfully disagree with this characterization of Kramer.

Claim 6, as amended, recites, for example, "defining at least one category as containing documents that may be retrieved." The category recited in claim 6 is not disclosed or suggested by the hierarchical attribute vectors of Kramer.

Serial No.: 09/282.764

fs End machine executable code for determining a first of said at least one supercategory based on at least one term of said user search query and said multiple categories of the at least one supercategory; and

machine executable code for displaying an advertisement associated with said first supercategory.

16. (Amended) The computer program product of Claim 15, wherein there is more than one supercategory and said first supercategory is a most relevant supercategory corresponding to said user search query, and the computer program product further includes:

machine executable code for ranking said more than one supercategory to determine said first supercategory.

19. (Twice Amended) The computer program product of Claim 15, further including:

machine executable code for ranking said documents in accordance with terms occurring in said user search query and terms occurring in said multiple categories of the first supercategory.

21. (Twice Amended) The computer program product of Claim 15, wherein said machine executable code for determining a first of said at least one supercategory in accordance with said user search query includes:

PETITION FOR EXTENSION OF TIME UNDER 37 CFR 1.136(a)

Dear Sir:

Applicant hereby petitions for an extension of one month to respond to the Final Office Action mailed from the USPTO on February 26, 2003 and to an Advisory Action mailed from the USPTO on July 8, 2003, the first reply having been filed within two months of the Final Rejection. Because of the present extension, the time period for response will now expire on August 8, 2003.

Please charge Deposit Account No. 07-2339 in the amount of \$110.00, the fee for this extension; and charge any additional fees, and credit any overpayment, to Deposit Account 07-2339. A duplicate copy of this petition is enclosed.

Respectfully submitted,
